President's Message to the Graduates

Congratulations on the successful completion of your studies! It has been a privilege to have you on this campus and I want to thank each and every one of you for being a part of our community during this important phase of your life.

As you take formal leave of your university, my colleagues and I would like you to know how proud you have made us by your outstanding performance in so many different areas. The laurels you have won as scholars, athletes, and young leaders have given new lustre to this historic institution. Because of your contributions, University of Maryland College Park has become one of the finest public universities in the nation.

On our part, we have endeavored to provide you with an ideal environment for nurturing your special interests and talents, and for developing the broad intellectual and cultural perspectives you will

need to compete successfully in the professional world. We hope, therefore, that your College Park education will prove to be well worth the time and effort you invested in it, and that your experience here, both inside and outside of the classroom, will serve you well in the years to come.

We hope, too, that you will always cherish the friendships you made here, and that College Park will always evoke the happiest of memories for you. Please continue to believe in us and our destiny as the flagship campus of Maryland. As you leave the university community to seek wider vistas and fresh challenges, we hope you will not wander too far—at least not in spirit—from your alma mater.

Good luck and Godspeed to each and every one of you!

Sincerely yours,

WE Kirwan

William E. Kirwan
President

Juanita Russell

Student Speaker

Someday, Juanita Russell wants to run a major corporation. She wants to make decisions, set strategic plans and even hold a board meeting or two.

Upon graduation, the 28-year-old accounting major will have the opportunity to begin her climb.

Russell will join an accountant training program at Electronic Data Systems (EDS) in Dallas, Texas—a company known best by its former auspicious decision-maker, Ross Perot. It was a tough choice since Russell was offered positions with all eight companies she interviewed with—including the Big Six accounting firms.

Russell credits her success with a knack for besting the challenges she faces. She earned a perfect 4.0 grade point average while working part time as a teaching assistant. What's more, Russell accomplished her goals with the additional challenge of rearing two children. Unable to study until after the children's bedtime at 10 p.m., Russell spent many nights up until 4 o'clock in the morning completing her assignments. She acknowledges her husband, Darryl, with helping her balance the difficult mix of family and school.

Throughout her time at College Park, Russell has been "very proactive" regarding her education. She developed close relationships with many professors and aggressively sought any wisdom they could pass on to her. "I wanted to reach into their heads and put [their knowledge] into mine," she says. Once when she complained of a mediocre teaching assistant, her professor told her if she thought she could do a better job, she should. The following semester Russell assisted with teaching

Introduction to Management Information Systems and was asked to continue for another term.

Her ambition and abilities have not gone unnoticed. In addition to being named student speaker, Russell received the Shirley Chisholm Award for outstanding African American female student on campus, the Beta Alpha Psi Academic Excellence Award and the Office of Multi-Ethnic Student Education Academic Excellence Award.

Throughout it all, her driving force has been a will to succeed—sometimes against the odds. "I don't like people to tell me I can't do something," she says. "It just makes me try harder."

And judging from where Russell sits today, she has backed up those words with action.

The May Graduates

Applicants for degrees

Total Doctoral Degrees:	422
Total Master's Degrees:	1,177
Total Bachelor's Degrees:	3,124

Five most popular undergraduate majors of degree applicants

1. Biological Sciences	186
2. English Language and Literature	181
3. Accounting	180
4. Government and Politics	165
5. Criminology and Criminal Justice	155

Most popular master's degrees

1. Master of Business Administration	113
2. Master of Science in Civil Engineering	65
3. Master of Library Science	51

Top colleges with the most degree applicants

1. Behavioral and Social Sciences	764
2. Arts and Humanities	627
3. Business and Management	403
4. Life Sciences	330
5. Engineering	305

Schedule of Events

Following the Commencement, individual graduation exercises for colleges and schools will be held at several campus locations. Ceremonies are scheduled to begin at noon, 2:30 p.m. and 5:00 p.m.* Guests are urged to be seated approximately one half-hour prior to the designated time for the ceremonies if they wish to observe the student and faculty procession.

Graduates, their families and friends, are cordially invited and encouraged to join with university officials and members of the faculty at the reception to be held on the Mall. The rain location: Grand Ballroom of Stamp Student Union.

Shuttle bus service will provide free transportation across the campus throughout the day.

Campus-Wide Commencement

9:30 a.m. Cole Student Activities Bldg.

Dear Graduates...

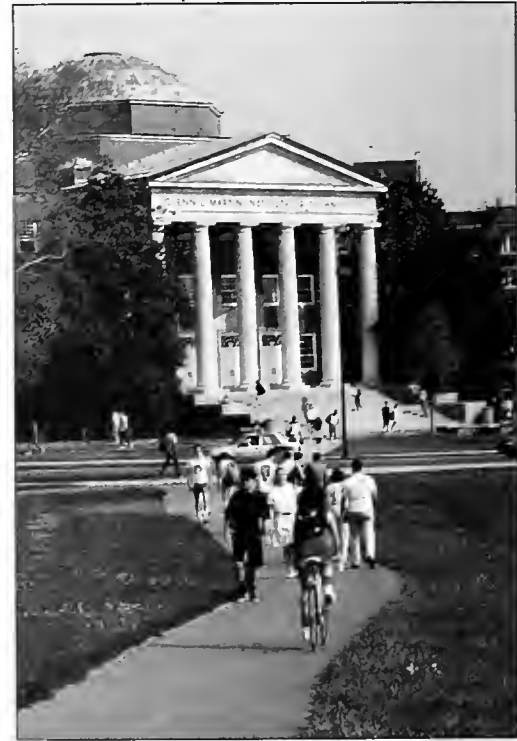

Congratulations on this wonderful accomplishment! As you leave the University of Maryland I hope you look back on your experiences with a smile on your face. Each student at the university has made a valuable contribution to the campus community and we are forever in your debt.

I have had the pleasure of working with so many of you inside and outside the classroom. I will sincerely miss your energy, drive and enthusiasm in the years to come. I hope that as you enter the "real world," you will continue to hold a special place in your heart for the University of Maryland. I encourage you to become an active alumnus and continue to stay a part of the campus community.

I hope that your academic experiences here have been fulfilling and that you are prepared for the future. I hope that your spirit and pride for Maryland continue to grow and flourish. And, I hope that you are successful in all your endeavors. Once again, good luck and thank you!

Sincerely,

Kerry Shagan,
SCA President

Today you complete the journey which was undertaken several years ago, arriving proudly at the threshold of a new life. When you look back, can you see how this journey has changed you? As you sit here today, what events stand out in your mind as experiences that showed you which path to travel?

As seniors, it is easier to list the ways in which we are different from each other than the ways we bond together. We are accustomed, by now, to describing students in groups—commuters, residents, members of ethnic, religious, or professional organizations; students in particular departments and colleges. These descriptions should be not a means of separation but something for us to admire about each other. We have each followed a unique path but have reached a common destination.

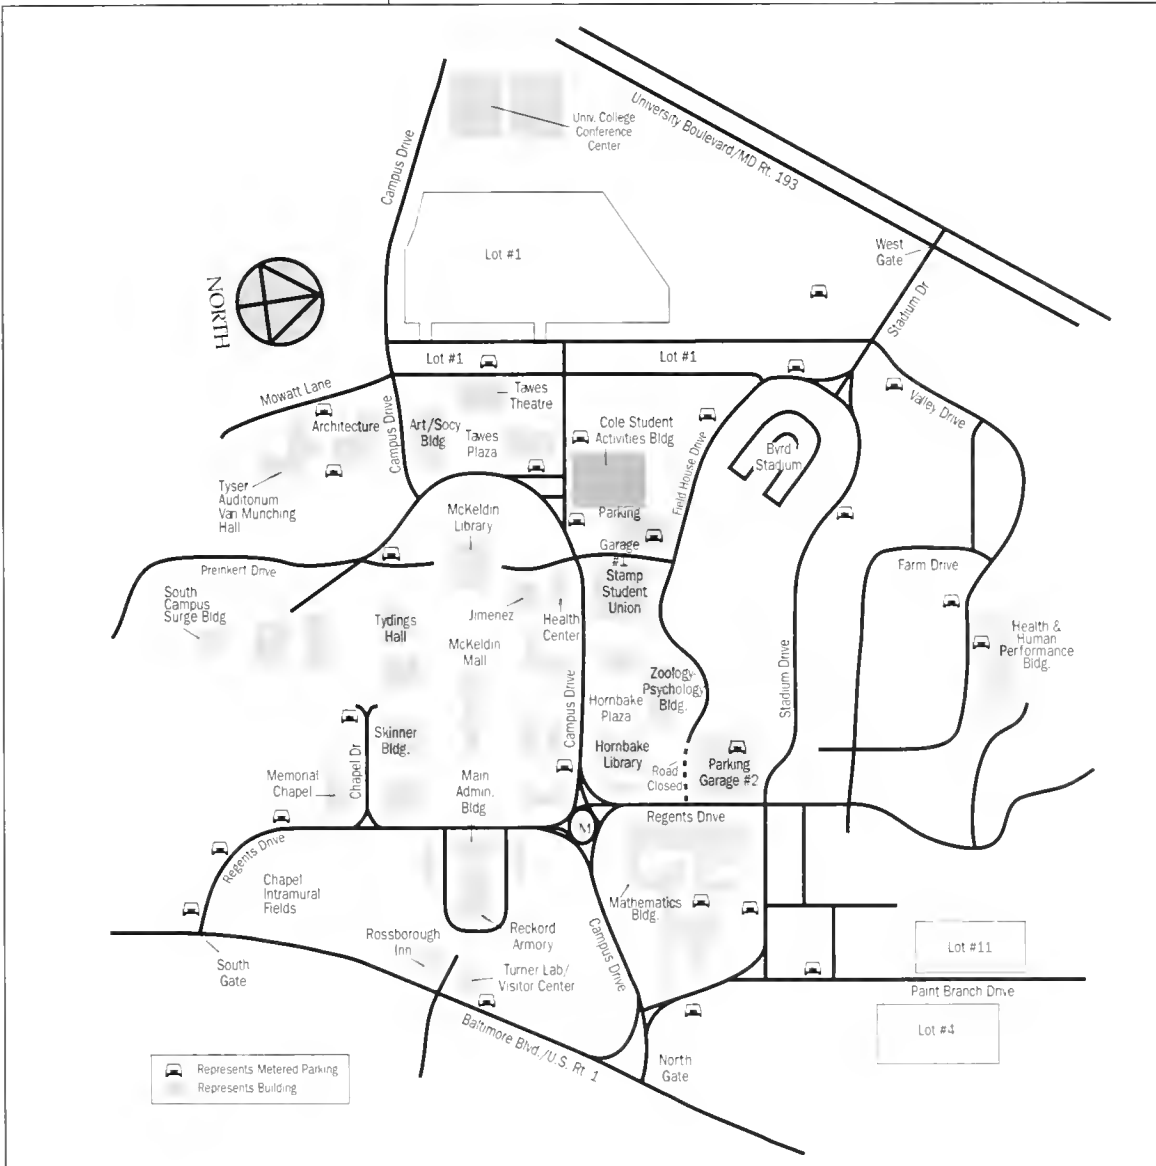

From this point, you can reflect on past journeys. Remember what you learned along the way about who you are and what you are capable of achieving. Know that your time spent at the University of Maryland at College Park will help you arrive at your next destination. Finally, always consider our campus to be another home, a stop on your life's journey to which you can always return.

Congratulations!

C. Teddy Li and Jennifer L. Collins
Senior Council Overall Co-Chairs

Campus Map

The University of Maryland at College Park

THE CAMPUS

Flagship campus of Maryland's 11-institution system of higher learning, the University of Maryland at College Park is the most comprehensive institution of higher education, research, and service in the state. The university offers 98 undergraduate majors, 87 master's programs, and 68 doctoral programs in 13 schools and colleges.

The university is one of only 30 public research universities that are members of the prestigious 58-member Association of American Universities and the only public institution in the Maryland-D.C. area with membership in the nation's most distinguished honor society, Phi Beta Kappa. It is classified as a Research-1 university by the Carnegie Foundation by virtue of the range of its baccalaureate programs, the amount of federal support received, and the number of doctoral degrees awarded each year, sharing that honor with the top research universities in the country.

The spring 1995 College Park campus at a glance:

Total enrollment:	30,371
Graduate Students:	8,034
Full-time:	3,958
Part-time:	4,076
Undergraduates:	22,337
Full-time:	18,813
Part-time:	3,524
Average age:	24.7
States represented:	50
Countries represented:	110
Minorities:	27%

Among public universities in the Association of American Universities, College Park ranks first in the percentage of African American undergraduate students. In addition, the university has the largest number of African American and other minority faculty members among its peers.

HISTORY

The University of Maryland was founded in 1807 in Baltimore as a faculty-owned College of Medicine.

The medical school was considered one of the top schools in the country, attracting notable professors and lecturers from throughout the world. In its beginning, tuition cost \$140, grades were sent home weekly to parents, and students could obtain room and board for \$300 annually.

Five years later, the growing institution was renamed the University of Maryland. Despite the name, the university was not considered a state institution as it was still owned and operated by faculty. Baltimore College of Dental Surgery, the first dental school in America, became a part of the university in 1840, awarding the first Doctor of Dental Surgery (D.D.S.) degree in 1841.

In 1859, the Maryland Agricultural College, which would evolve into the University of Maryland at College Park, was opened under a charter secured by a group of Maryland planters in 1856. In addition to spending one hour each day hoeing or plowing on the college farm, students took a broad range of

courses in ancient and modern languages, natural sciences, English, and mathematics. The state acquired the college and rebuilt it after a disastrous fire on campus in 1912.

In 1920, the state legislature joined College Park with the professional schools in Baltimore to form an expanded University of Maryland. The entity eventually grew to include campuses in Baltimore County, the Eastern Shore, and University College, a continuing education institution.

The following decades saw the increasing growth of student population, excellence in programs and curricula, and the burgeoning of College Park into a nationally recognized research institution.

July 1, 1988 marked the dawn of a new era in higher education in the state of Maryland, as the five campuses of the university were merged with six other state universities and colleges to form the University of Maryland System, and College Park secured its flagship status with a mandate to become one of the pre-eminent research universities in the nation.

RESEARCH

The unique role of American research universities in advancing science and technology has kept the United States in the forefront of innovation and product development. Research dollars from federal and state agencies, corporations and foundations fuel much of the basic and applied research activity of the University of Maryland at College Park's faculty and graduate students.

The stature and success of the university in fields like engineering, computer science, the physical

sciences and chemistry, agriculture, and environmental studies, attracts an increasing amount of research funding each year. In 1994, contract and grant awards totaled \$138.2 million.

The university has unique facilities, research centers and institutes that attract new research projects and funding, as well as provide expanded knowledge in business, science and technology. The College of Engineering houses the Glenn L. Martin Wind Tunnel—the most advanced aerodynamic testing facility of its kind on any university campus—and the Neutral Buoyancy Facility, which simulates weightlessness for space research, the only such facility on a university campus. Other specialized facilities include:

- Computer Vision Laboratory
- Bioprocess-scale up Laboratory
- Laboratory for Ion Beam Research and Application
- Superconductivity Research Center
- Laboratory for Plasma and Fusion Studies
- Psycholinguistics Laboratory
- Computer-assisted cartographic laboratories
- Developmental Psychology Laboratory
- Center on Aging

SERVICE

Programs of public service are central to the overall mission of College Park. This philosophy is reflected in the wide array of programs and initiatives that benefit the state's business, agriculture, and education communities.

With more than 900 high technology firms in the three-county area of Montgomery, Prince George's and Frederick, the university has found abundant opportunity to extend its business and technology outreach programs to the region. Many of these programs are part of the Engineering Research Center, which operates the Technology Extension Service, the Technology Advancement Program, and Maryland Industrial Partnerships, all programs designed to provide Maryland entrepreneurs and small businesses with research facilities, technical assistance, administrative support, and access to technology that will advance their economic base.

The Institute for Systems Research has formed partnerships with major corporations, including Martin Marietta, Westinghouse, BFGoodrich, Hughes Aircraft, and Dupont to apply advanced systems research to solving industry problems in the fields of communications, manufacturing, controls and robotics.

The Center for Renaissance and Baroque Studies works in conjunction with Maryland's high schools in using theater to explore personal and social issues relevant to today's society. Team Maryland also works with area public schools by having student athletes serve as mentors to young students. Each semester student athletes act as role models to as many as 5,200 students.

The University of Maryland at College Park features a diversity of cultural and recreational activities.

Through four art galleries, over 200 annual musical performances, and countless dance and theater productions, audiences are exposed to the broadest range of programs in the arts. And intercollegiate, club, or intramural sports provide athletes of all levels an opportunity to take part as spectators or participants.

THE LIBRARIES

The seven libraries at College Park constitute the largest university research library system in the Washington metropolitan area, providing vital resources to researchers, visiting scholars, and businesses throughout the region. The libraries' holdings include over 2.2 million volumes, 19,309 subscriptions to periodicals, and nearly 4.8 million items available in microfilm format. College Park libraries also offer several nationally and internationally recognized special collections such as the International Piano Archives at Maryland, the National Trust for Historical Preservation, the Katherine Anne Porter literary archive and the National Public Broadcasting Archives.

THE ALUMNI ASSOCIATION

With alumni clubs from Miami, Fla. to Taipei, Taiwan, the Alumni Association strives to keep and strengthen ties between the university and its graduates. Member events such as pre-game parties, bull roasts, picnics, golf tournaments,

dinner cruises and subscription to *College Park* magazine help keep alumni connected to the university and to each other. All graduating seniors and successful master's and Ph.D. candidates receive a six-month free membership in the association.

THE ALUMNI

Graduates of the university go on to distinguished careers in a variety of fields. Chosen from thousands of qualified alumni, an inaugural class was inducted into the University of Maryland Alumni Association Hall of Fame last April. Included are 21 outstanding individuals who have brought, and continue to bring, great honor to their alma mater. Their achievements are as varied as their lives, but they all have one thing in common: a degree from the University of Maryland at College Park.

Carmen Balthrop, B.A. '71

World-class soprano and mentor to aspiring vocalists

Harry Clifton "Curley" Bird, B.S. '08

Legendary university president for 18 years

A. James Clark, B.S. '50

Construction magnate and benefactor

William P. Cole Jr., B.S. '10

Congressman and member of UM Board of Regents for 25 years

Mary Stallings Coleman, B.A. '35

First woman elected as Chief Justice, Michigan Supreme Court

Geary F. Eppley, B.S. '20, M.S. '26

Devoted career to university as dean of men and athletic director

Charles F. Fefferman, B.S. '66

Youngest winner of Field's Medal, mathematics' esteemed award

Herbert A. Hauptman, Ph.D. '55

Co-recipient of 1985 Nobel Prize in Chemistry

Jim Henson, B.A. '60

Creator of the beloved Muppets

Steny H. Hoyer, B.S. '63

Public servant to Maryland for nearly 30 years

Carlisle Humelsine, B.A. '37

Leader of Colonial Williamsburg Foundation

Wilbur Munro Leaf, B.A. '27

Creator of "Ferdinand the Bull" story

Samuel J. LeFrak, B.S. '40

Internationally acclaimed urban planning leader

Parren Mitchell, M.A. '52

First African American student and Maryland congressman

Jane Cahill Pfeiffer, B.A. '54

First woman to head a major network; named chair of NBC in 1978

Judith A. Resnik, Ph.D. '77

Pioneering astronaut; died tragically in Challenger shuttle disaster

Chun-Shan Shen, Ph.D. '61

President of Taiwan's National Tsing-Hua University

William Woolford Skinner, B.S. 1895

Nationally prominent agricultural research chemist

Adele H. Stamp, M.A. '24

Dean of women at Maryland from 1922 to 1960

Reginald Van Trump Truitt, B.S. '14

*Leading naturalist and marine biologist;
pioneered bay research*

Millard E. Tydings, B.S. '10

*Introduced legislation to create University of
Maryland in 1920*

The University of Maryland Alumni Association Hall of Fame is located in the Commuter Lounge of the Stamp Student Union. Periodically, the Alumni Association will induct other graduates in to the Hall of Fame—its highest honor.

CUSTOMS OF COMMENCEMENT

Early commencement ceremonies at the University of Maryland were marked with great fanfare and celebration. The faculty gave huge banquets for the graduates the night before the event. The following morning, crowds gathered to watch the young graduates parade. It was a gala social occasion, attracting not only friends and relatives, but the fashionable elite of the day. At the ceremony, prayers were recited, speeches were made, and honorary degrees were awarded to distinguished figures from across the country. Finally, as the audience cheered and threw flowers, the graduates came forward to collect their Latin-inscribed degrees.

Academic Costume

The black caps and gowns worn by the students and faculty in the academic procession have been the traditional costume of scholars since the Middle Ages. The ordinary dress of the scholar, whether student or teacher, was similar to that of a cleric. Caps and gowns were probably worn to keep students warm in unheated buildings. Many medieval scholars

were tonsured, like monks, and hoods served to cover the shaved head until the skull cap later took its place.

Even after the Civil War, most students at American universities wore caps and gowns daily while in residence. These varied in design until they were standardized by the American Intercollegiate Commission in 1894. At that time it was decided that all robes would be black. Colors on the trim of the gown were also standardized to indicate the scholar's academic discipline.

A list of department colors follows:

Agriculture: Maize
 Arts, Letters, Humanities: White
 Business Administration,
 Commercial Science: Drab
 Dentistry: Lilac
 Economics: Copper
 Education: Light Blue
 Engineering: Orange
 Fine Arts, Architecture: Brown
 Forestry: Russet
 Home Economics: Maroon
 Journalism: Crimson
 Law: Purple
 Library Science: Lemon
 Medicine: Green
 Music: Pink

Nursing: Apricot
 Oratory, Speech: Silver Gray
 Pharmacy: Olive
 Philanthropy: Rose
 Philosophy: Dark Blue
 Public Administration, Foreign
 Service: Peacock Blue
 Public Health: Salmon
 Physical Education: Sage Green
 Science: Golden Yellow
 Social Work: Citron
 Theology and Divinity: Scarlet
 Veterinary Sciences: Gray

The tassel may also be colored to represent an academic discipline or it may be black. Officially, the tassel is permitted "to lie where it will" on the mortarboard. However, numerous institutions have adopted the practice of having degree candidates wear the tassel on the right front side at the start of the commencement ceremony and then shift them to the left side after degrees are awarded.

Student Marshals

Elected through a nomination process, student marshals are senior leaders who play an important role in the graduation ceremony. Student marshals assist in organizing the thousands of graduates, leading them smoothly through the commencement procession. They also supply extra caps and hoods, and bobby pins to keep headwear secure. May 1995 marshals are listed on page 73 of this booklet.

Senior Gift

The senior gift is a university tradition dating back 84 years. The first senior gift, the iron gate entrance at the Rossborough Inn, was given by the class of 1910. As this year's gift from the graduating class, seniors have elected to donate

funds for the continued renovation of the North Gate entrance to the university—including a 6-foot bronze seal, additional plantings and lights.

The purpose of the senior gift is twofold. Each year the senior class leaves behind a memorable legacy for new students and visitors, and provides the university with a gift that enhances the campus atmosphere.

Past senior gifts have included: the Testudo statue (Class of 1933), the lights around the “M” in the traffic circle on Campus Drive (Class of 1986), and the restoration of the Chapel chimes and clock face (Class of 1992).

ACADEMIC DEGREES

A degree is awarded for the successful completion of a course of study. There are more than 1,600 different academic degrees currently conferred by colleges and universities nationwide. The University of Maryland at College Park offers degrees in 98 undergraduate majors, 87 master’s programs, and 68 doctoral programs.

The Doctor’s Degree

The doctor’s degree represents the most advanced earned degree conferred by American institutions. There are two distinct types: the practitioner’s degree and the research degree. The first type represents advanced training for the practice of various professions, principally Doctor of Medicine, Juris Doctor, and Doctor of Pharmacy. These degrees do not involve the completion of original research by the student. The University of Maryland, at the professional school in Baltimore, awarded the first two dental degrees

in history on March 9, 1841, and invented the name of the degree, Doctor of Dental Surgery (D.D.S.).

The second type is the research doctorate representing prolonged periods of advanced study. A dissertation which usually accompanies the study is intended to contribute substantially to the body of knowledge on the subject. The most important of these, the Doctor of Philosophy, no longer has an implication of philosophy for its holder, but represents advanced research in any of the major fields of knowledge. It was first awarded in the United States in 1861 by Yale University. The University of Maryland awarded a Ph.D. for the first time in 1920.

The Master’s Degree

The master’s degree is an academic honor bestowed upon students who have successfully completed work beyond the baccalaureate. A thesis and an oral examination are usually required. In 1920, the University of Maryland awarded its first Master of Arts (M.A.) and Master of Science (M.S.) degrees in fields other than agriculture.

The Bachelor’s Degree

The bachelor’s degree represents the completion of a four-year course of college-level study and is the oldest academic degree awarded by American institutions of higher learning. It was first conferred in America in 1642 on the first nine graduates of Harvard College. Maryland Agriculture College, which later became the University of Maryland at College Park, awarded its first Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) in 1862.

Honorary Degree

Each year the University of Maryland at College Park awards honorary degrees to persons approved by a campus committee, the provost, the president, and the university’s Board of Regents. Through the bestowal of these degrees, the university seeks to recognize outstanding achievement in government, business, education, science, and the arts. In recent years the committee has sought to recognize individuals in the greater Washington-Baltimore area who have made significant contributions to an improved quality of life in the region. Honorary degrees have also been awarded to graduates of College Park who have gone on to enjoy notably successful careers. Past honorary degree recipients include Isaac Asimov (1977), Eubie Blake (1978), Bill Cosby (1992), Hugh Downs (1988), Ralph Ellison (1974), Milton Eisenhower (1958), Jim Henson (1978), Hubert H. Humphrey (1965), Lyndon Baines Johnson (1963), and Andrew Wyeth (1964).

Carl T. Rowan

Honorary Doctor of Letters

As the title of his 1991 memoir suggests, Carl T. Rowan has spent a lifetime “breaking barriers.” From growing up in abject poverty in a small, segregated town in the South to becoming, at one time, the highest ranking African American in the United States government, Rowan has consistently overcome overt racism and challenged injustice in achieving his goals.

Today Rowan is one of the nation’s most respected journalists, known for his syndicated columns, his television appearances on “Inside Washington” and his radio show, “The Rowan Hour.” He is the only journalist in American history to win a coveted Sigma Delta Chi medallion for excellence in his field in three successive years. In addition to his best-selling autobiography, *Breaking Barriers*, he has written six other books. But Rowan’s successes have not come easily.

The poverty he grew up in was one of desperation. His family was always short on food and the Jim Crow laws of McMinnville, Tenn., did not often permit African Americans to improve their living conditions. But Rowan was smart. He became the valedictorian of his high school even though he was barred from entering the town library because of his race. After graduation, he aspired to attend college and become a Naval officer—an unheard of career choice for blacks in the early 1940s.

Scrubbing porches in a tuberculosis hospital paid tuition at Tennessee State College in Nashville and Rowan went on to earn good grades and pass a

nationally competitive exam in 1943 for admission into a Naval training program. At age 19 he became one of the first 20 African Americans to win commissioned rank in the U.S. Navy.

After World War II, Rowan prepared for a career in journalism at Oberlin College and the University of Minnesota. Again, he broke another barrier by becoming one of the first black reporters for a major daily newspaper, the *Minneapolis Tribune*. He went on to cover the civil rights movement and became closely acquainted with Martin Luther King Jr. and other civil rights leaders. Still, Rowan believed he could do more to improve the country’s racial climate.

With his emergence as a leading national voice, Rowan was tapped by President Kennedy to serve as deputy assistant secretary of state and to help integrate the State Department. Kennedy then picked Rowan to serve as a delegate to the United Nations during the Cuban Missile Crisis, and, later, to break new ground as ambassador to Finland.

After the assassination of President Kennedy, President Johnson made Rowan director of the U.S. Information Agency, replacing the ailing Edward R. Murrow. In that post, Rowan became the first African American in history to sit with the U.S. National Security Council and the President’s Cabinet. Another barrier had been broken.

In 1987, Rowan founded Project Excellence, a scholarship program designed to reward African American high school students who dare to excel in learning, writing and speaking. Due to his efforts and the work of others, hundreds of high-achieving black high school seniors have received aid for college, helping them to break barriers of their own.

Martin Feinstein

Honorary Doctor of Fine Arts

At 12-years-old Martin Feinstein announced to his mother one Saturday that he was going to the opera with 50 cents he had saved from doing his chores. Of that money, he spent 35 cents on the ticket, 10 cents on subway fare from Brooklyn to downtown Manhattan and 5 cents on a candy bar at intermission. All it took was that afternoon performance, and he was hooked.

Decades later, as general director of the Washington Opera, Martin Feinstein would transform what was once a struggling opera company into one of the country's most respected. He did it by attracting some of the world's most recognizable talents, by taking chances and by placing excellence in performance above all other attributes. "I've always believed in quality," he says. "Quality will win you a public."

And win a public he did. The company has averaged 98 percent attendance since the 1985-86 season and has operated in the black at a time when other opera companies are struggling to attract an audience.

When Feinstein took the helm of the Washington Opera in 1980, the company performed only four different operas during its 16-performance season. By 1993, the company had grown to some 65 performances of seven operas in two different theaters at the Kennedy Center.

Artistically, Feinstein helped to attract some of the world's most dynamic performers to Washington, D.C. As executive director of the Kennedy Center from 1972 to 1980, one of his first acts was to orga-

nize an annual ballet series that has brought a steady stream of internationally renowned ballet companies to Washington, delighting audiences. In the realm of opera, subscribers saw the New York City Opera, and the United States' premier performances of the Bolshoi, Paris, Berlin, La Scala and Vienna State opera companies. It was the exclusive appearances of the last three that led *The New York Times* to call the Washington Opera's progressive director, "the cultural powerhouse on the Potomac" and to wonder if New York would "lose its hegemony as the country's cultural capital."

Feinstein grew up in New York—in the Williamsburg section of Brooklyn—and worked his way through City College. One of his jobs was selling libretti at the Metropolitan Opera which enabled him to gain exposure to a variety of operas. He translated his love of opera into a master's degree in music from Wayne State University in Detroit. After serving in the military, he began work for the famous impresario Sol Hurok in 1946; he rose to vice president of Hurok Concerts before being invited to work for the Kennedy Center.

This June, Feinstein will retire to the role of consultant. As he reflects on his many accomplishments before his retirement, Feinstein says he is most proud of the legacy he has left behind for the District. Washington has come from a city "barren of culture to one that is both a cultural and political capital," he says. Now it will be up to his already well-known successor, conductor and tenor Plácido Domingo, to continue in the Feinstein tradition.

Armando Samper Gnecco

Honorary Doctor of Science

When it comes to the business of keeping his native Colombia green, Armando Samper Gnecco has been advising presidents, establishing policy and educating students for 50 years. Samper is known as the “father of resource economics” in Colombia, and is credited with “inventing” the field of agricultural economics independently in that country. He has twice served as the Secretary of Agriculture for Colombia, and has been a member of the board of directors of virtually every important private and public agricultural institution in Colombia.

When Samper arrived as an undergraduate at the University of Maryland at College Park in 1939, he was greatly surprised to find that the field of agricultural economics already existed and that the university had a Department of Farm Management Economics. Studying under Arthur B. Hamilton, one of the university’s earliest and most prominent faculty members in the field, Samper excelled in his schoolwork and eventually exhausted all the university could teach him. Hamilton suggested it would be in his best interest to move to Cornell University to complete his studies which he did in 1943.

Samper returned to Colombia where he accepted a teaching position with the University of the Andes in Bogotá and later became chair of the economics department. In 1949 he took a research position with the prestigious Institute for Inter-American Cooperation in Agriculture (IICA) in San Jose,

Costa Rica. With IICA, Samper initiated a variety of programs that altered the way agricultural research and research management were conducted, influencing farming practices throughout Latin America. He was also responsible for beginning one of the first scientific journals on agricultural economics in Latin America, *Terrialba*. As a result of his pioneering work, he was named director general of IICA in 1960, and he continues to be involved with the organization’s activities as a director emeritus since 1980.

Samper’s involvement in Colombian politics and in establishing the agricultural policy of his home country has been just as significant. He first served as Secretary of Agriculture from 1966 to 1967 and again from 1969 to 1970. When he has not been officially appointed in that capacity, Colombian presidents have sought his counsel on agricultural matters.

Samper was a founding member of the Center for International Tropical Agriculture (CIAT), and served as its president from 1973 to 1976. Under his charge, CIAT sought to advise Latin American farmers on ways in which to grow profitable crops while maintaining the fragile environment of the tropics.

Samper, who served as president of the University of Bogotá during the early 1970s, has always been a productive scholar. His numerous books and articles have had a profound impact on the development of agricultural policy in Colombia and in surrounding countries where he remains, to this day, an authoritative voice.

James McGroddy

Class of 1965

Distinguished Alumnus

James McGroddy, senior vice president of research at IBM, will forever be known as the man who bridged the "white space."

When IBM's massive size and complexity became a liability during the early 1980s, as small, upstart computer companies began out-hustling Big Blue, McGroddy came up with the idea of the "joint program," a research and development structure which broke down walls between divisions in the company and improved technology transfer from concept to product. The result was an IBM with a greater ability to bring technology to the customer faster and more efficiently, and a renewed future as one of the largest companies in the world.

Today, McGroddy returns to his alma mater as a distinguished alumnus, 30 years after he left the university with a Ph.D. in physics. Much has happened in those 30 years to a man who is currently responsible for managing the work of 2,600 technical professionals in five laboratories around the world.

After leaving the university in 1965 as a post-doc, McGroddy joined IBM in its infancy and focused his energies on solid state devices and condensed matter physics. It was during a period at IBM that saw the development of major inventions that would have a lasting impact on the field of computing. Fortran, field effect transistor technology and dynamic RAM all emerged during this time. McGroddy himself garnered 10 patents for various electronic devices and lasers.

But then the computer industry changed. In stepped McGroddy and his concept of the joint program. "We brought the researchers, product developers, and in some cases, manufacturers, together into teams, pooling resources to fuel the process," he says. "The first of those programs started in 1980...and has led to a significant and quantifiable acceleration of pace in semiconductor technology which has given IBM a sustained position of leadership still in place today."

His contribution led to seven years at IBM's corporate headquarters as an executive in manufacturing and development organizations. In 1989 he was named to his current position as head of IBM's research division where he applied the joint program practice to include the company's marketing and service units.

McGroddy is a member of the U.S. National Academy of Engineering, a fellow of the Institute of Electrical and Electronic Engineers and a fellow of the American Physical Society. He has dedicated his life to making sure that not only machines work better for humans, but that humans work more effectively with one another.

Student Marshals

The Senior Marshal Program, which began in 1991, is an opportunity for the campus community to acknowledge outstanding seniors at their commencement. The students selected to be marshals were nominated by faculty, administrators and staff for their outstanding accomplishments and contributions to the university. We are proud to recognize these truly remarkable students.

Sigma Alpha Omicron Award to the outstanding senior in Microbiology

Stephanie Lynn Scoville

The Sigma Circle of Omicron Delta Kappa Leader of the Year awarded to members who have

demonstrated the most outstanding leadership within the circle and on the campus

Paul S. Mandell

Society of Automotive Engineers' Achievement Award (Dept. of Mechanical Engineering)

Russell D. Hester

Society of Fire Protection Engineers' Student Chapter Award for distinguished and outstanding service to the chapter

Christian DuBay

SORSA Award funded by the international organization, Spatially Oriented Referencing Systems Association (SORSA), is given occasionally to either an undergraduate or graduate student specializing in geography. It is awarded for an original methodological contribution to the field of geographical information systems.

Donald A. Jarvinen

Dr. Mabel S. Spencer Scholarship awarded in honor of Dr. Spencer, distinguished former professor in the College of Education. A preference is given to students in home economics education.

Pamela Sikowitz

Henrietta Spiegel Creative Writing Award granted to the outstanding graduating senior whose creative writing efforts were judged by the creative writing staff to be superior. (Dept. of English)

Michael Clark
Jason Novak

Spirit of Maryland Award presented annually during Homecoming in lieu of the traditional Homecoming King/Queen honorees. The award is presented to a male and female member of the senior class, who during their collegiate career, most nearly typified the "spirit" of Maryland. The award is presented during half-time of the Homecoming football game.

Paul Mandell
Shana Cochrane

Rueben G. Steinmeyer Award (Dept. of Government and Politics)

Michael K. Tractor

State Farm Exceptional Student Fellowship Award (College of Business and Management)

Maisha Kai Herron

Student Commencement Speaker for the Journalism ceremony.

December 1994:

Margaret Ellen Talev

Scholarship Honors

Bachelor's degree candidates who have qualified for scholarship honors upon graduation are designated by appropriate symbols adjacent to their names within the alphabetical listings of colleges or schools.

To be eligible for consideration for such honors a candidate must meet the following general criteria: (1) have completed at least two years of work at the University of Maryland (60 semester hours, 30 of which were earned at the College Park campus), and (2) have a scholastic average of a "B" (grade point average of 3.0) or higher in University of Maryland work prior to the last semester of registration before the awarding of a degree.

Degree candidates who have met these criteria are shown in the listings as qualifying, upon graduation, for the designators *Summa cum Laude* (if they ranked in the top 2 percent of the candidates in their respective colleges or schools), *Magna cum Laude* (if in the next 3 percent), or *cum Laude* (if in the next 5 percent) based on the grade point averages of students in the preceding three graduating classes of their degree-granting unit.
